

Data Integration

Joint Lessons Learned Information System and Joint Training Information Management System

Data Integration Overview

- **Purpose**
- **Phased approach**
 - **JLLIS design concept**
 - **JTIMS design concept**

Systems Integration: Joint Lessons Learned Information System (JLLIS)

Ms. Diane Lent-Tucker
Joint Staff J7
Joint Lessons Learned
Branch

Purpose of Integration

- **To meet the requirements defined by the users**
- **Reduce duplication of effort**
- **Provide seamless sharing of data**
- **Increase the speed and accuracy of information sharing**

JLLIS Design Concept for Integration

- **Implement a phased approach for JLLIS and JTIMS Data Integration**
- **Phase one:**
 - **JLLIS establish link to access other DoD systems (JTIMS, JDEIS)**
- **Determine JLLIS requirements for enhanced integration capabilities**

Phase One of Integration: The Initial Link

Menu bar persists throughout JLLIS

LOGOUT MYPROFILE TEAM TOOLS LINKS ADMIN EMAIL US

Menu items possess drop-down capability where each link opens in a new window

Arrangement of menu bar follows standard format (eg. 'Home' is always located at the upper left corner, 'Email Us' is always at the upper right corner, etc.)

Phase Two of Integration: Importing Data from JTIMS

- **Phase Two: JLLIS Import Capability**
 - **JLLIS develop capability for manual import of JTIMS LL Initial Observation Data (XML File)**
 - **Determine JLLIS requirements for enhanced integration capabilities (Web Services)**

Long-Range Goal and Last Phase of Integration

- Near 'real-time' data exchange
 - Seamless data sharing/integration between JLLIS and JTIMS
 - JTIMS LL Initial Observations, when approved, will *automatically* update the corresponding organization's JLLIS with *no* manual effort
